Product description	Compact unit for consumer bulk feeding of used beverage containers
Container type	PET bottles, aluminum cans and glass bottles
Container shape	Cylindrical Diameter: 50 - 130 mm. Length: up to 400 mm Minimum ratio between cylindrical length and diameter: 1.4
Detection method	360° detection of bar codes
Capacity	80 - 150 containers/minute depending on actual mix
Registration accuracy	≥ 99.5%
Infeed	By the consumer - typically in plastic sacks
Inliner module	Mono Disc Ultra
Sorter	Flat table-top conveyor
Sorting stations	No-reads, PET bottles, aluminum cans, glass bottles
Network	LAN for transmission of counting data files and a LAN for Eazy/VPN for remote support and trouble-shooting
Power consumption	Approx. 1.0 kW 3 phase voltage + N + PE
Operation conditions	Ambient temperature min. +7°C to max. +40°C
Compressed air	Consumption of 12 m ³ per hour at 8 bar
Dimensions	Approx. 8.5 x 2.3 metres (LxW)
Approval	CE or UL/CSA
