

Anker Andersen Quarterly

Strategic update

With our new strategy, Anker Andersen has defined a strategic framework that guides both our technological development and operational priorities.

Our focus areas include:

- Innovation (increasing system complexity and higher volumes).
- Operational excellence (stable performance and customer satisfaction).
- Sustainable solutions (efficient and reliable deposit return systems).

Implementation in Poland

POLAND: We are proud to be part of the implementation of the Deposit Return System in Poland, contributing with high-performance counting and sorting solutions delivered to multiple system operators.

Eneris Surowce, Poland's largest waste management company, has launched 11 counting centres across the country and equipped them with Anker Andersen HLZ® processing lines. As part of its cooperation with two deposit system operators: Reselekt and Kaucja.PL, Eneris' counting centres will process over 650 million packages per year.

Supporting the launch of Portuguese Deposit Return System

PORTUGAL: Portugal will officially launch its national Deposit Return System (DRS) for beverage containers on April 10, marking an important step toward a more circular and sustainable economy.

Anker Andersen will support the rollout with the first HLZ® deliveries to counting centres in Porto and Lisbon, contributing to operational readiness from day one. By providing high-performance counting and sorting technology, we help ensure efficient processing and reliable system performance as the Portuguese DRS moves into operation.

Meet us: EuroShop 2026 – with RVM Systems

We look forward to meeting customers and partners at EuroShop 2026.

- 📍 Düsseldorf, Germany
- 📅 22–26 February 2026
- 📍 Hall 7a, Stand C19

Anker Andersen will be exhibiting with our parent company, RVM Systems, highlighting the close collaboration between our organizations and our shared commitment to delivering end-to-end deposit return solutions.

Stop by the stand to discuss high-speed counting and sorting solutions, system integration and future DRS developments. We look forward to welcoming you.

A letter from our CEO

I am pleased to share this edition of Anker Andersen Quarterly - our regular update where we highlight strategic direction, market progress and collaboration across the deposit return system.

Shortly before the end of 2025, we launched our new corporate strategy, Next Level '29.

The strategy sets a clear and ambitious direction for the coming three years, with innovation, operational excellence and sustainability as our key strategic pillars.

I look forward to continuing the dialogue with customers and partners as we move into this next phase.

Thank you for your continued interest in Anker Andersen. We look forward to sharing further updates in future editions of Anker Andersen Quarterly and to continuing the dialogue with you.

Kind regards
Anker Andersen A/S

Helle Borup Friberg
CEO
