

## “Anker 3.0” – Headline News, December 2022

### Anker Andersen A/S - Strategy “3.0”

During the past months we have worked intensively on developing a mobile/ moveable high-speed counting and sorting solution built into a pavilion or a trailer. The pavilion demo model will soon be ready for demonstration at our premises in Tørring, Denmark, so keep an eye on your inbox regarding an invitation.

### New Orders

Scotland will become the first UK nation to introduce a Deposit Return Scheme in 2023, and Biffa will be the official logistics service provider. At Anker Andersen we are very proud to have been chosen as the supplier of high-performance counting and sorting systems and thereby assisting Scotland in their aim to ensure that at least 90% of beverage containers are prevented from being waste and instead enter into the circular economy.

### Our Partners

The team of RVM Systems Türkiye has successfully completed a comprehensive technical training course regarding our HLZ<sup>®</sup> system consisting of installation, commissioning and maintenance modules. The training was given by Anker Andersen A/S' experienced supervisor Michael Iversen and application engineer Henrik Lous. RVM Systems Türkiye are now ready with the technology and a competent team for the Turkish Deposit Management System, which will start in 2023!

### After Sales Care

As our customers have different types of applications and requirements, we have developed a service concept offering individual service programs ranging from “Basic Care” to “Own Care” to “Complete Care”, giving our customers a flexible way to manage their service and maintenance.

In addition, we are working on a strong support setup offering outside office hours support to our global customers.

Anders Topp Daugaard states *“it is strategically important to us to provide superior and efficient After Sales Service to our customers. If you have any questions or inquiries, please contact our After Sales Manager Mette Havndrup Pedersen”*.

### New ERP System

At present key employees and consultants are working hard on the preparations for the coming implementation of the ERP system 365 Business Central in order to streamline our business and make us ready for future growth. If things proceed according to plan, we expect to “go live” in the first quarter of 2023.

### Merry Christmas and Happy New Year

The Christmas holidays are just round the corner, and we would like to thank you for the co-operation in 2022 and wish you a very merry Christmas and a happy New Year! Anker Andersen will be closed from 23<sup>rd</sup> December and until 2<sup>nd</sup> January 2023, so remember to order your service visit and/or spare parts well in advance.
