

“Anker 4.0” – Headline News, October 2024

New Order for Dansk Retursystem A/S, Denmark

We are proud to announce that Dansk Retursystem A/S, the Danish Scheme operator for beverage containers with deposit, has ordered ten new HLZ[®] machines to equip five new bottle deposit centers (Pantstation) in Denmark.

The new bottle deposit centers will be added to the fourteen sites already operational in Denmark and will strengthen Dansk Retursystem A/S' collection network by getting even closer to beverage consumers across the country. Our cooperation with Dansk Retursystem A/S supports Anker Andersen's continued commitment to providing innovative solutions for recycling contributing to a more sustainable future.

The Dutch company Techno Trend delivered a new counting center to Plus Retail B.V. in Deventer in September 2024. This facility is equipped with three Anker Andersen HLZ[®] counting machines, with the option to expand to five HLZ[®] machines.

At the beginning of October, Techno Trend will start building a second counting center for Plus Retail B.V., located in Oss. In this fully mechanized distribution center, a counting operation is built on a mezzanine floor. In the initial phase, the counting operation will be started with four Anker Andersen HLZ[®] counting machines with an option to expand the counting operation to six HLZ[®] machines.

Once both locations are up and running, they will collectively process 280 million used beverage packages annually.

RCA's 2024 Circular Economy Conference, Alberta, Canada

From October 30 to November 1, 2024, Anker Andersen A/S, represented by CEO Anders Topp Daugaard and Sales Manager Merete Birk Hansen, will attend the RCA Circular Economy Conference in Alberta, Canada <https://conference.recycle.ab.ca/>. This conference presents an excellent opportunity to engage with both new and existing customers and to discuss ways to further improve the counting and sorting processes for used beverage containers at local bottle depots. So, stop by booth 8 and meet our team!

New Colleagues in the Management Team

We are pleased to welcome two new members to our management team, who will contribute to a further strengthening of our organization.

Tina Petersen has joined us as Quality, Environment, and Sustainability Manager. She will oversee our quality and environmental management systems and bring structure to our processes and workflows, with the goal of achieving an ISO certification in the future.

Ove Stein has come onboard as our new Factory Manager. He will focus on optimizing production, procurement, and warehouse/logistics operations in close collaboration with his team. Additionally, he shall ensure strong partnerships with subcontractors and that we consistently meet our delivery commitments.
