

HLZ Debris Separator

The unique HLZ Debris Separator is ideal for separation of objects like straws, strings, caps and other garbage from the UBC.

The system offers on-line separation and has the same capacity as the HLZ line of counting and sorting systems.

The HLZ Debris Separator is mounted between a bulk feeder and the HLZ counting and sorting machine.

We have a large and small HLZ debris separator for the HLZ MD and the HLZ MD Ultra series of machines.

Technical Specifications

Dimensions	Customizable
Power	3 Phase volt. + N + PE
Motor (kW)	2.2
Infeed	by optional external feeder

Highlights

Material construction	Stainless Steel AISI304
Capacity	100 - 300 containers / min.
Registration accuracy	≥99.5%
Container types	PET, Alu cans, glass
Container shape	Cylindrical Ø50-130 mm.
Container length	Up to 400 mm/16"
Structure	Multiple module combination
Approval	CE, UL, CSA

Illustrated model: Standard Debris Separator
